BIO

Dr. Marie Leger is a board certified dermatologist at Metro Dermatology, a private practice in New York City, where she treats a predominantly Spanish speaking population. Prior to joining private practice, she was an Assistant Professor of Dermatology at Weill Cornell College of Medicine for two years and at New York University for four years. She completed her dermatology residency at New York University where she also served as chief resident. Dr. Leger attended medical school at the University of Illinois where she was elected to Alpha Omega Alpha, the national medical honors society. She also earned a PhD at the University of Illinois in the Institute of Communications Research, and received her undergraduate degree in molecular and cell biology at the University of California, Berkeley.

Her research interests include tattoo health and removal, technology and health, telemedicine, and international dermatology. She treats a broad range of medical and cosmetic skin conditions, and has particular expertise in autoimmune blistering skin conditions.

Dr. Leger consults with organizations such as the FDA and New York Department of Health and Mental Hygiene about tattoo health and access to isotretinoin for acne. She started the first tattoo center in the US at Cornell University, which she now runs out of Metro Dermatology, and has lectured tattoo artists about skin health, skin cancer detection, and tattoo safety. In addition, she is the founder of a collaborative tattoo removal program at Metro Dermatology with the Legal Aid Society and the Administration for Children's Services in New York City for victims of human trafficking. She is a former host of Doctor Radio on Sirius XM. Dr. Leger is also a founding member of a teaching and research collaboration between the University of Ghana and New York University.

Dr. Leger is from the San Francisco Bay Area and has spent time working and traveling in Mexico City, Central America, and Africa.
