

ESTP
RESEARCH

8th World Congress of Tattoo & Pigment Research

9–11 June 2027, Basel

Sponsorship Information

We are delighted that you are interested in sponsoring ESTP 2027. As organizers, we are committed to making your sponsorship valuable for both you and your company. We offer a range of sponsorship packages with opportunities to promote your brand before, during, and after the congress – including logo placement on congress materials, the website and social media, and presentation opportunities.

The **ESTP 2027 will gather participants from around the world in the fields of:**

- Tattoo & permanent make up (PMU)
- Legislation & regulation
- Pigment research
- Ink chemistry and analytics
- Dermatology
- Tattoo-related medicine

We would be happy to prepare an **individual offer tailored to your needs.**

Plenty of opportunities to **strengthen your brand and increase awareness, expand your network, solidify your status as an expert, generate interest in your products,** and, last but not least, **demonstrate your commitment to tattoo safety by supporting research in the field.**

Organization: European Society of Tattoo and Pigment Research

Congress & Sponsor Management: Codan Consulting, info@codan-consulting.com

European Society of Tattoo and Pigment Research

The **European Society of Tattoo and Pigment Research** was founded in November 2013 in Copenhagen as an independent organization without economic and political interests. The aim of ESTP is to improve the knowledge about tattoos in today's daily life and to further develop the safety and quality of tattoos and permanent make-up (PMU).

ESTP serves as a platform for **scientists, physicians, dermatologists, tattoo and PMU artists as well as manufacturers and distributors who wish to contribute to advancing the knowledge of tattoos and PMU.** Furthermore, by pooling the expertise of these various relevant fields, regulations in different countries and the European Union can be reasonably influenced. Since ESTP's inception, congresses have been held every two years in various European cities to provide opportunities for knowledge sharing and networking.

For more information, please visit:

www.estp-research.org

The **biennial ESTP Congress** is a hybrid event bringing together researchers, medical professionals, tattoo and PMU artists, industry representatives, authorities, and others interested in tattoos and pigments. The congress provides a **unique platform for exchanging knowledge, exploring the latest developments in tattoo and pigment research, and expanding international networks.**

Other ways to get involved

Become a supporting member of the ESTP

More info on ESTP membership

<https://estp-research.org/estp-membership/>

Make a donation as per ESTP statutes

Donations from any party can be received by the Society combined with or independent of Membership, without or with adherence to a specific project. All donations must be reviewed by the Board and will be communicated transparently to the Members at the General Meeting. The Board can refuse donations for any given reasons, e.g. if the independent acting, legal or public standing of the Society could be endangered by such action.
